

Region 9 Multicenter Acute Care Surgery (MACS) Consortium Study Proposal Form

Instructions: Complete all applicable fields. Expand narrative sections as needed. The principal investigator should submit the completed form with any supporting documents requested by the Steering Committee.

1. Administrative Information

Study Title	
Principal Investigator	
Institution	
Email	
Co-Investigator(s)	

2. Scientific Overview

Background and Rationale
Study Question
Primary Hypothesis / Objectives
Secondary Objectives

3. Study Design

Study Type	
Study Population	
Inclusion Criteria	
Exclusion Criteria	
Primary Outcome	
Secondary Outcome(s)	

4. Feasibility and Data Needs

Anticipated Number of Sites	
Estimated Sample Size	
Data Source(s)	
Key Variables Requested	
Will chart abstraction be required?	
Estimated burden on participating sites	

5. Statistical and Analytic Plan

Summary of analytic approach	
Power / sample size justification, if applicable	

6. Regulatory and Operational Considerations

Local IRB Approved?	
Need for DUA or data transfer agreement?	
Funding available?	
Funding source, if applicable	

7. Proposed Scholarly Plan

Target meeting(s)	
Target journal(s)	
Proposed authorship framework	
Will there likely be secondary analyses?	

I attest that this proposal is scientifically original to the best of my knowledge, has not been submitted as a competing Region 9 MTC project, and will adhere to consortium policies if approved.
